

Aleen AlQarni

ale1425en@gmail.com | 0557987016 | Dhahran | Portfolio

OBJECTIVE

Software Engineering student at KFUPM with experience in full-stack web development, software testing, database design, and machine learning projects. Skilled in Python, Java, SQL, and React. Passionate about building scalable software solutions and AI-driven technologies. Seeking a training opportunity to apply technical skills and gain hands-on industry experience.

EXPERIENCE

KFUPM – Software Engineering Projects 01/2022 – Present | Dhahran

Fuzzing Project for Software Testing

05/2026

- Conducted automated software testing using AFL++ and AddressSanitizer to identify crashes and security vulnerabilities in bzip2.
- Performed coverage-guided fuzzing and analyzed software behavior to improve reliability and robustness.
- Investigated detected failures and documented findings using industry-standard testing practices.

Horse Management System

01/2025

- Designed and implemented a relational database using SQL to manage horse information, training records, and operational data.
- Developed database structures and queries to ensure efficient data storage and retrieval.
- Applied database design principles to support data integrity and scalability.

Portfolio Website

11/2024

- Developed and deployed a responsive personal portfolio website showcasing technical projects and skills.
- Implemented modern web development practices to create an accessible and user-friendly experience.
- Maintained and updated project content using front-end development technologies.

Learn Hub

07/2024

- Designed and developed a full-stack web application to support educational services and student engagement.
- Created user-centered UI/UX designs using Figma and implemented responsive interfaces.
- Integrated application components with backend services and databases to enhance functionality and user experience.

KFUPM Student Impact Hub

06/2023

- Collaborated within a multidisciplinary team to develop a community service platform connecting students and organizations.
- Participated in requirements gathering, system analysis, and UI design activities.
- Contributed to project planning, communication, and software development processes.

Car Classification System

08/2022

- Developed a machine learning classification model using Python to categorize used vehicles in Saudi Arabia.
- Performed data preprocessing, feature engineering, model training, and performance evaluation.
- Applied analytical techniques to improve prediction accuracy and support data-driven decision making.

EDUCATION

Bachelor of Science in Software Engineering,
King Fahad University of Petroleum and Minerals, KFUPM

08/2022 – Present | Dhahran, Saudi Arabia

Relevant Coursework:

- Software Design & Architecture
- Web & Mobile Development
- Database Systems
- Data Structures & Algorithms
- Software Requirements Engineering

SKILLS

Software Engineering

- Software Testing
- Requirements Engineering
- Object-Oriented Programming (OOP)
- Agile Development
- System Analysis and Design

Programming Languages

- Python
- Java
- JavaScript

Artificial Intelligence & Data

- Machine Learning Fundamentals
- Data Analysis
- Data Preprocessing
- Model Evaluation

Web Development

- HTML
- CSS
- React
- REST APIs

Tools & Technologies

- Git
- VS Code
- PyCharm
- Figma
- Microsoft Office Suite

Databases

- SQL
- MySQL
- MongoDB

LANGUAGES

Arabic
Native

English
TOEFL (530)
